- Adopt Service Oriented Architecture

NIDHiTECH
Business Resolutions with IT Solutions

Founded July 2004, NIDHiTECH, is a business solutions provider to eliminate business challenges and improve business efficiency.

We firmly believe technology is not a solution, but usage of cohesive and right mix of technologies will provide the most efficient resolutions to business problems. Best problem solvers are the people who can articulate problems precisely. Hence, understanding business problems and articulating precisely is half the solution and utilizing right mix of technologies will solve the rest half, providing most efficient solutions.

At NIDHiTECH, we listen **(we mean active listening!)** and we work with our customers to resolve business problems so you can achieve high efficiency in your existing environment by utilizing Business Process Re-engineering and right mix of technologies.

Our people take the time to **listen** and understand your business issues and create **agile solutions** with a **minimum mix of technologies**. We use right tools and **go-getters** to achieve the most **efficient solution** for our customers. And we ensure our customers have 100% **visibility** in the solutions we create.
